Voice, messaging and internet data anywhere on the globe

SATELLITE BROADBAND SOLUTIONS

GLOBAL XPRESS SYSTEMS

The GX system has been designed to support global coverage and enable global mobility. The system includes the space segment and ground segment to provide complete GEO-visible earth connectivity.

GX 5075 Fly-Away VSAT

- Automatic antenna pointing system
- High Speed portable satellite internet
- Deploy anywhere in the world
- Fly-Away Transport in 2 pelican boxes
- Speed up to 8Mbps up / 4Mbps down

GX 3075 Fly-Away VSAT

- Manual pointing Antenna System
- High Speed portable satellite internet
- Deploy anywhere in the world
- Fly-Away Transport in 2 pelican boxes
- Speed up to 8Mbps up / 4Mbps down

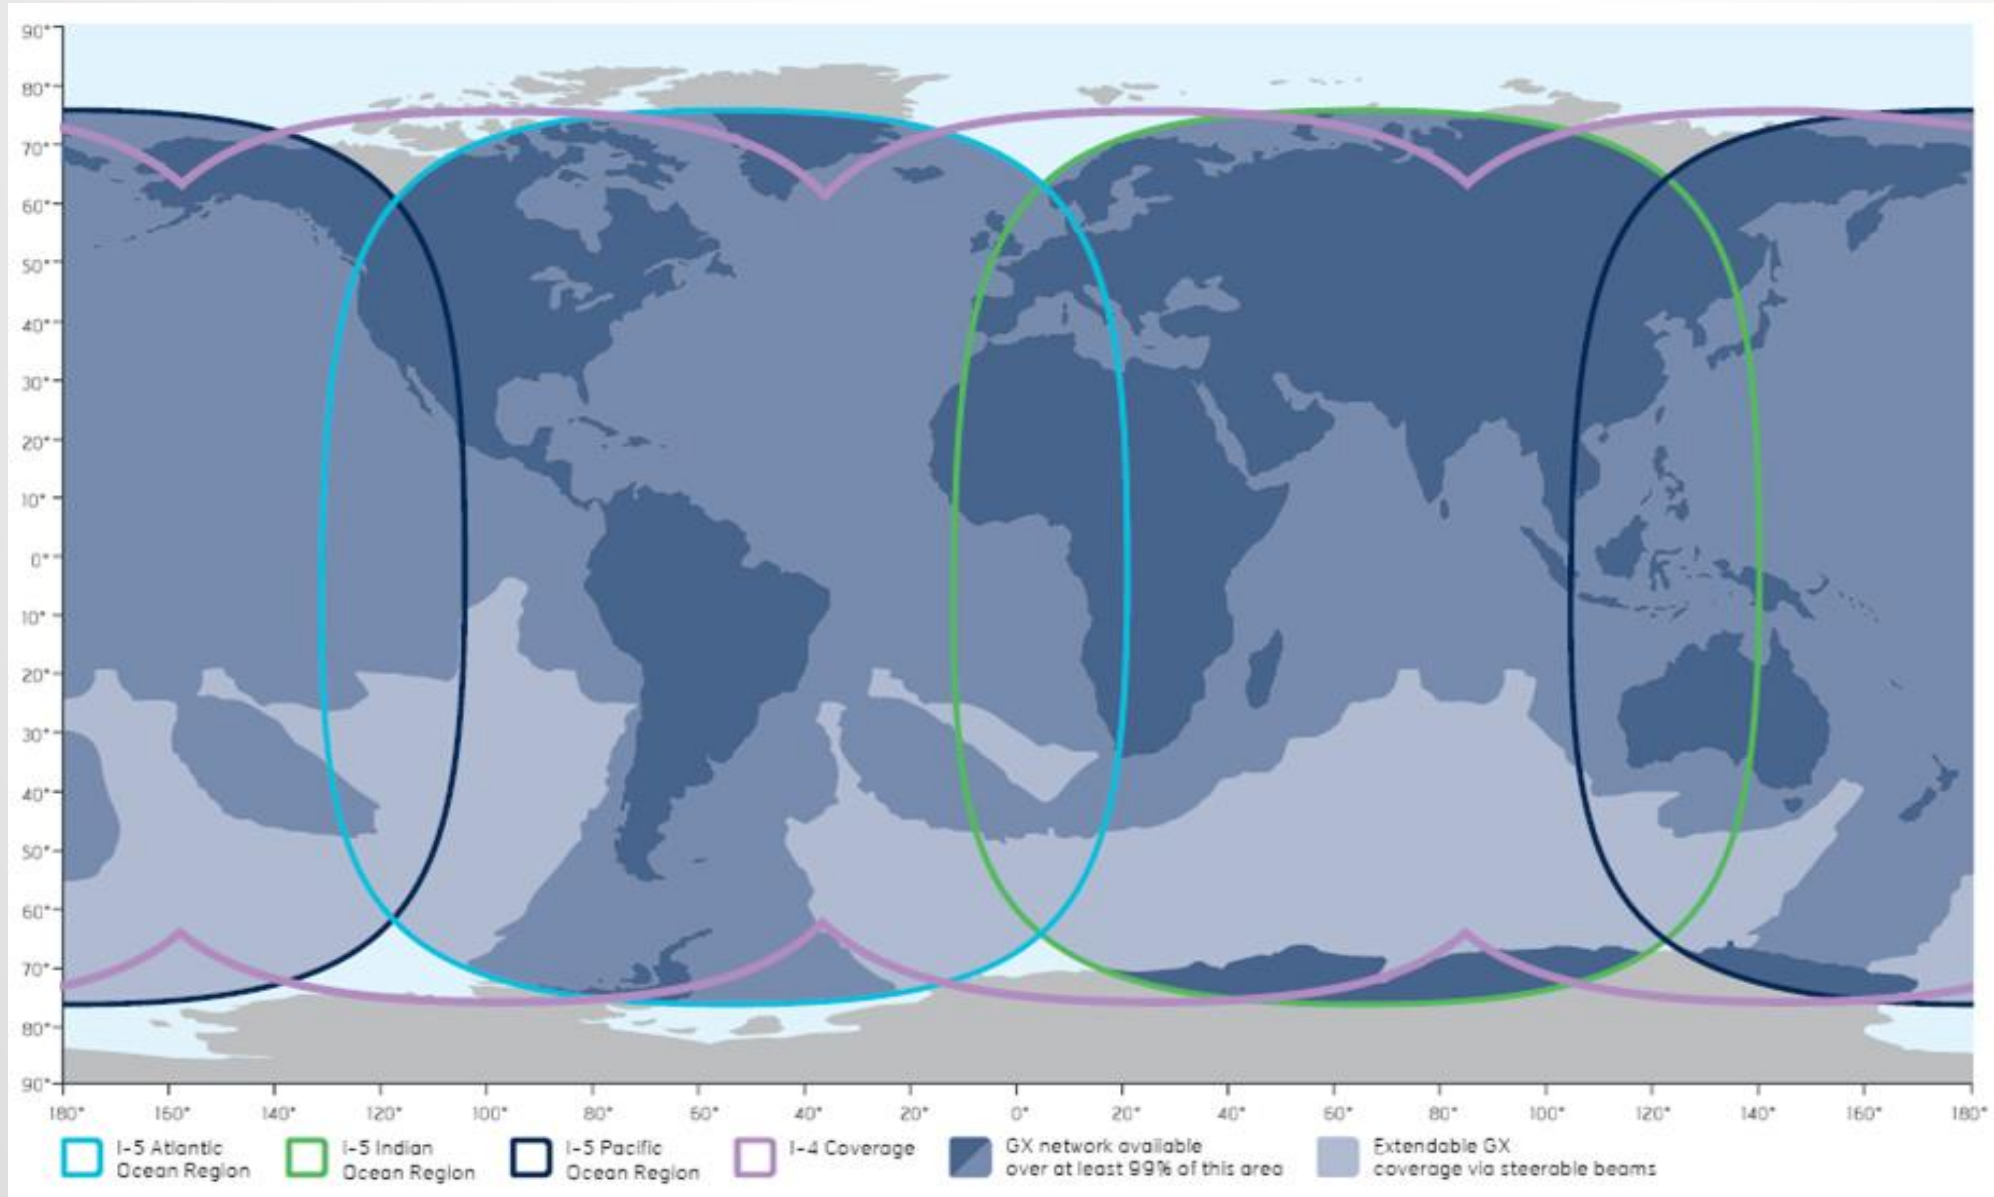

Operating in the resilient Ka-band, while integrating seamlessly with our proven L-band network, Global Xpress allows customers across aviation, maritime, enterprise and government sectors to have reliable and assured access to high-throughput communications.

KYMETA™
AUTHORIZED PARTNER

NEW HIGH SPEED INTERNET ON THE MOVE

Kymeta KyWay™

KYMETA™
AUTHORIZED PARTNER

Kymeta KyWay™ u7 Ku-band satellite terminals address the need for lightweight, low-profile, and high-throughput communication systems that out perform any mechanical system fixed and on-the-move making connecting nearly any vehicle, vessel, or fixed platform easier and more reliable than ever before.

Kymeta KYWAY U7 8W / 16W

- Capable of transmitting and receiving data while on the move
- Speeds up to 4Mbps down and 1 Mbps up
- Live streaming and wifi integration
- Made from revolutionary Meta Materials
- No moving parts
- Seamless and low-profile installation options

Kymeta KyWay™ Go

- Fastest and easiest to deploy high speed satellite terminal on the market "plug and play"
- Speeds up to 4Mbps down and 1 Mbps up
- Packs into 2 pelican cases
- Live streaming and wifi integration
- Made from revolutionary Metamaterials
- No moving parts

Inmarsat BGAN

By delivering simultaneous voice and broadband data, Inmarsat's BGAN (Broadband Global Area Network) brings satellite communications to new levels of mobility, performance and reach.

BGAN provides instant voice and high-speed data connectivity for remote activities all over the world.

HOW MANY MEGABYTES DO I NEED?

- Quick Guide on how many Megabytes you might need for specific uses.
- This is just an average, it's different scenario for everyone.
- Social media can sometimes spend more if you watch videos.

 SatellitePhoneStore.com	20 MB	100 MB	250 MB	500 MB	1000 MB	5000 MB	10000 MB	30000 MB
 E-mails	1,300 E-mails	6,600 E-mails	16,600 E-mails	33,200 E-mails	65,000 E-mails	325,000 E-mails	650,000 E-mails	1,950,000 E-mails
 Browse web	7 Pages	35 Pages	83 Pages	166 Pages	350 Pages	1,750 Pages	3,500 Pages	10,500 Pages
 Social Media	20 Posts	100 Posts	250 Posts	500 Posts	1,000 Posts	5,000 Posts	10,000 Posts	30,000 Posts
 Skype Videos	20 Minutes	100 Minutes	250 Minutes	500 Minutes	16,6 Hours	83 Hours	166 Hours	500 Hours
 Youtube 450p	4 Minutes	20 Minutes	50 Minutes	100 Minutes	3,5 Hours	17,5 Hours	35 Hours	105 Hours
 HD Images	6 Photos	33 Photos	83 Photos	166 Photos	350 Photos	1,750 Photos	3,500 Photos	10,500 Photos
 Wi-fi Calls	1 Hour	6,6 Hours	16 Hours	32 Hours	70 Hours	350 Hours	700 Hours	2,100 Hours

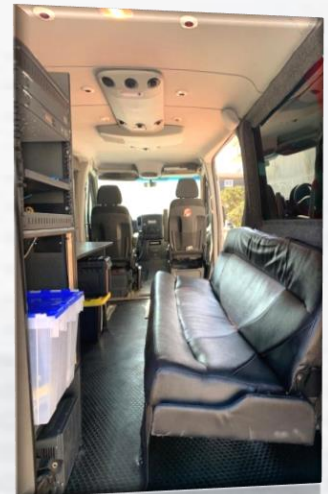

** Values mentioned are approximate based on the average user. It can be different for everyone because your emails can contain attachments = will increase the size. If a website is not optimized, it can spend more mb. Youtube Video quality is also very important, it can spend your megabytes.*

MOBILE COMMUNICATIONS VAN

Independent Mobile Communications Unit

- High speed internet in any remote region
- WIFI area coverage
- Operated by experienced technician
- Solar, battery and diesel power source
- High capacity power bank
- Easy setup within 10 minutes
- Telephone
- Satellite Internet
- 32" TV
- Fridge
- 10 Electric Sockets
- Office chair / Work desk

MOBILE COMMUNICATIONS SUV

SATELLITE WIFI ON THE GO With **Kymeta Flat Panel Antenna**

- 4mbps/1mbps
- Internet in any remote region
- WIFI area coverage
- Easy to operate
- Easy setup within 10 minutes
- Telephone
- Go Off-Road
- Electric Sockets

IRIDIUM PUSH TO TALK SERVICES

- ✓ Iridium Push-to-Talk (PTT) is a global, fully mobile push-to-talk system that enables fast and simple group communications at the push of a button, anywhere on earth.
- ✓ Iridium PTT takes the local functionality of walkie-talkie, formally known as a handheld transceiver, and takes it to a global level by allowing users in a talkgroup to communicate real time even with thousands of miles distance between them.

FAST & MOBILE

Fully integrated for reliable on-the-move handheld use. Call set-up and inter-call performance in-line with traditional solutions.

RELIABLE & SECURE

Iridium Push-to-Talk communications are kept private with AES 256 encryption. Automatic programming and registration with easy-to-use menu navigation.

GLOBAL COVERAGE

Works from pole-to-pole, where and when you need it. Use on-foot, in-vehicle or in-building with available accessories.

Iridium Extreme 9575 Push To Talk

- ✓ Meets military-grade durability standards
- ✓ Jet-water, shock and dust resistance (IP65-rated)
- ✓ Compact, lightweight design for ultimate portability
- ✓ Diamond treaded, taper grip for in-hand ergonomics
- ✓ Integrated loudspeaker
- ✓ Rugged, high-gain antenna
- ✓ Daylight-readable, glare-resistant display
- ✓ 2.5 mm (0.1") headset and hands-free capability
- ✓ Mini-USB data port
- ✓ Dedicated SOS button in phone mode
- ✓ PTT Mode Features

ICOM PTT Satellite Radio

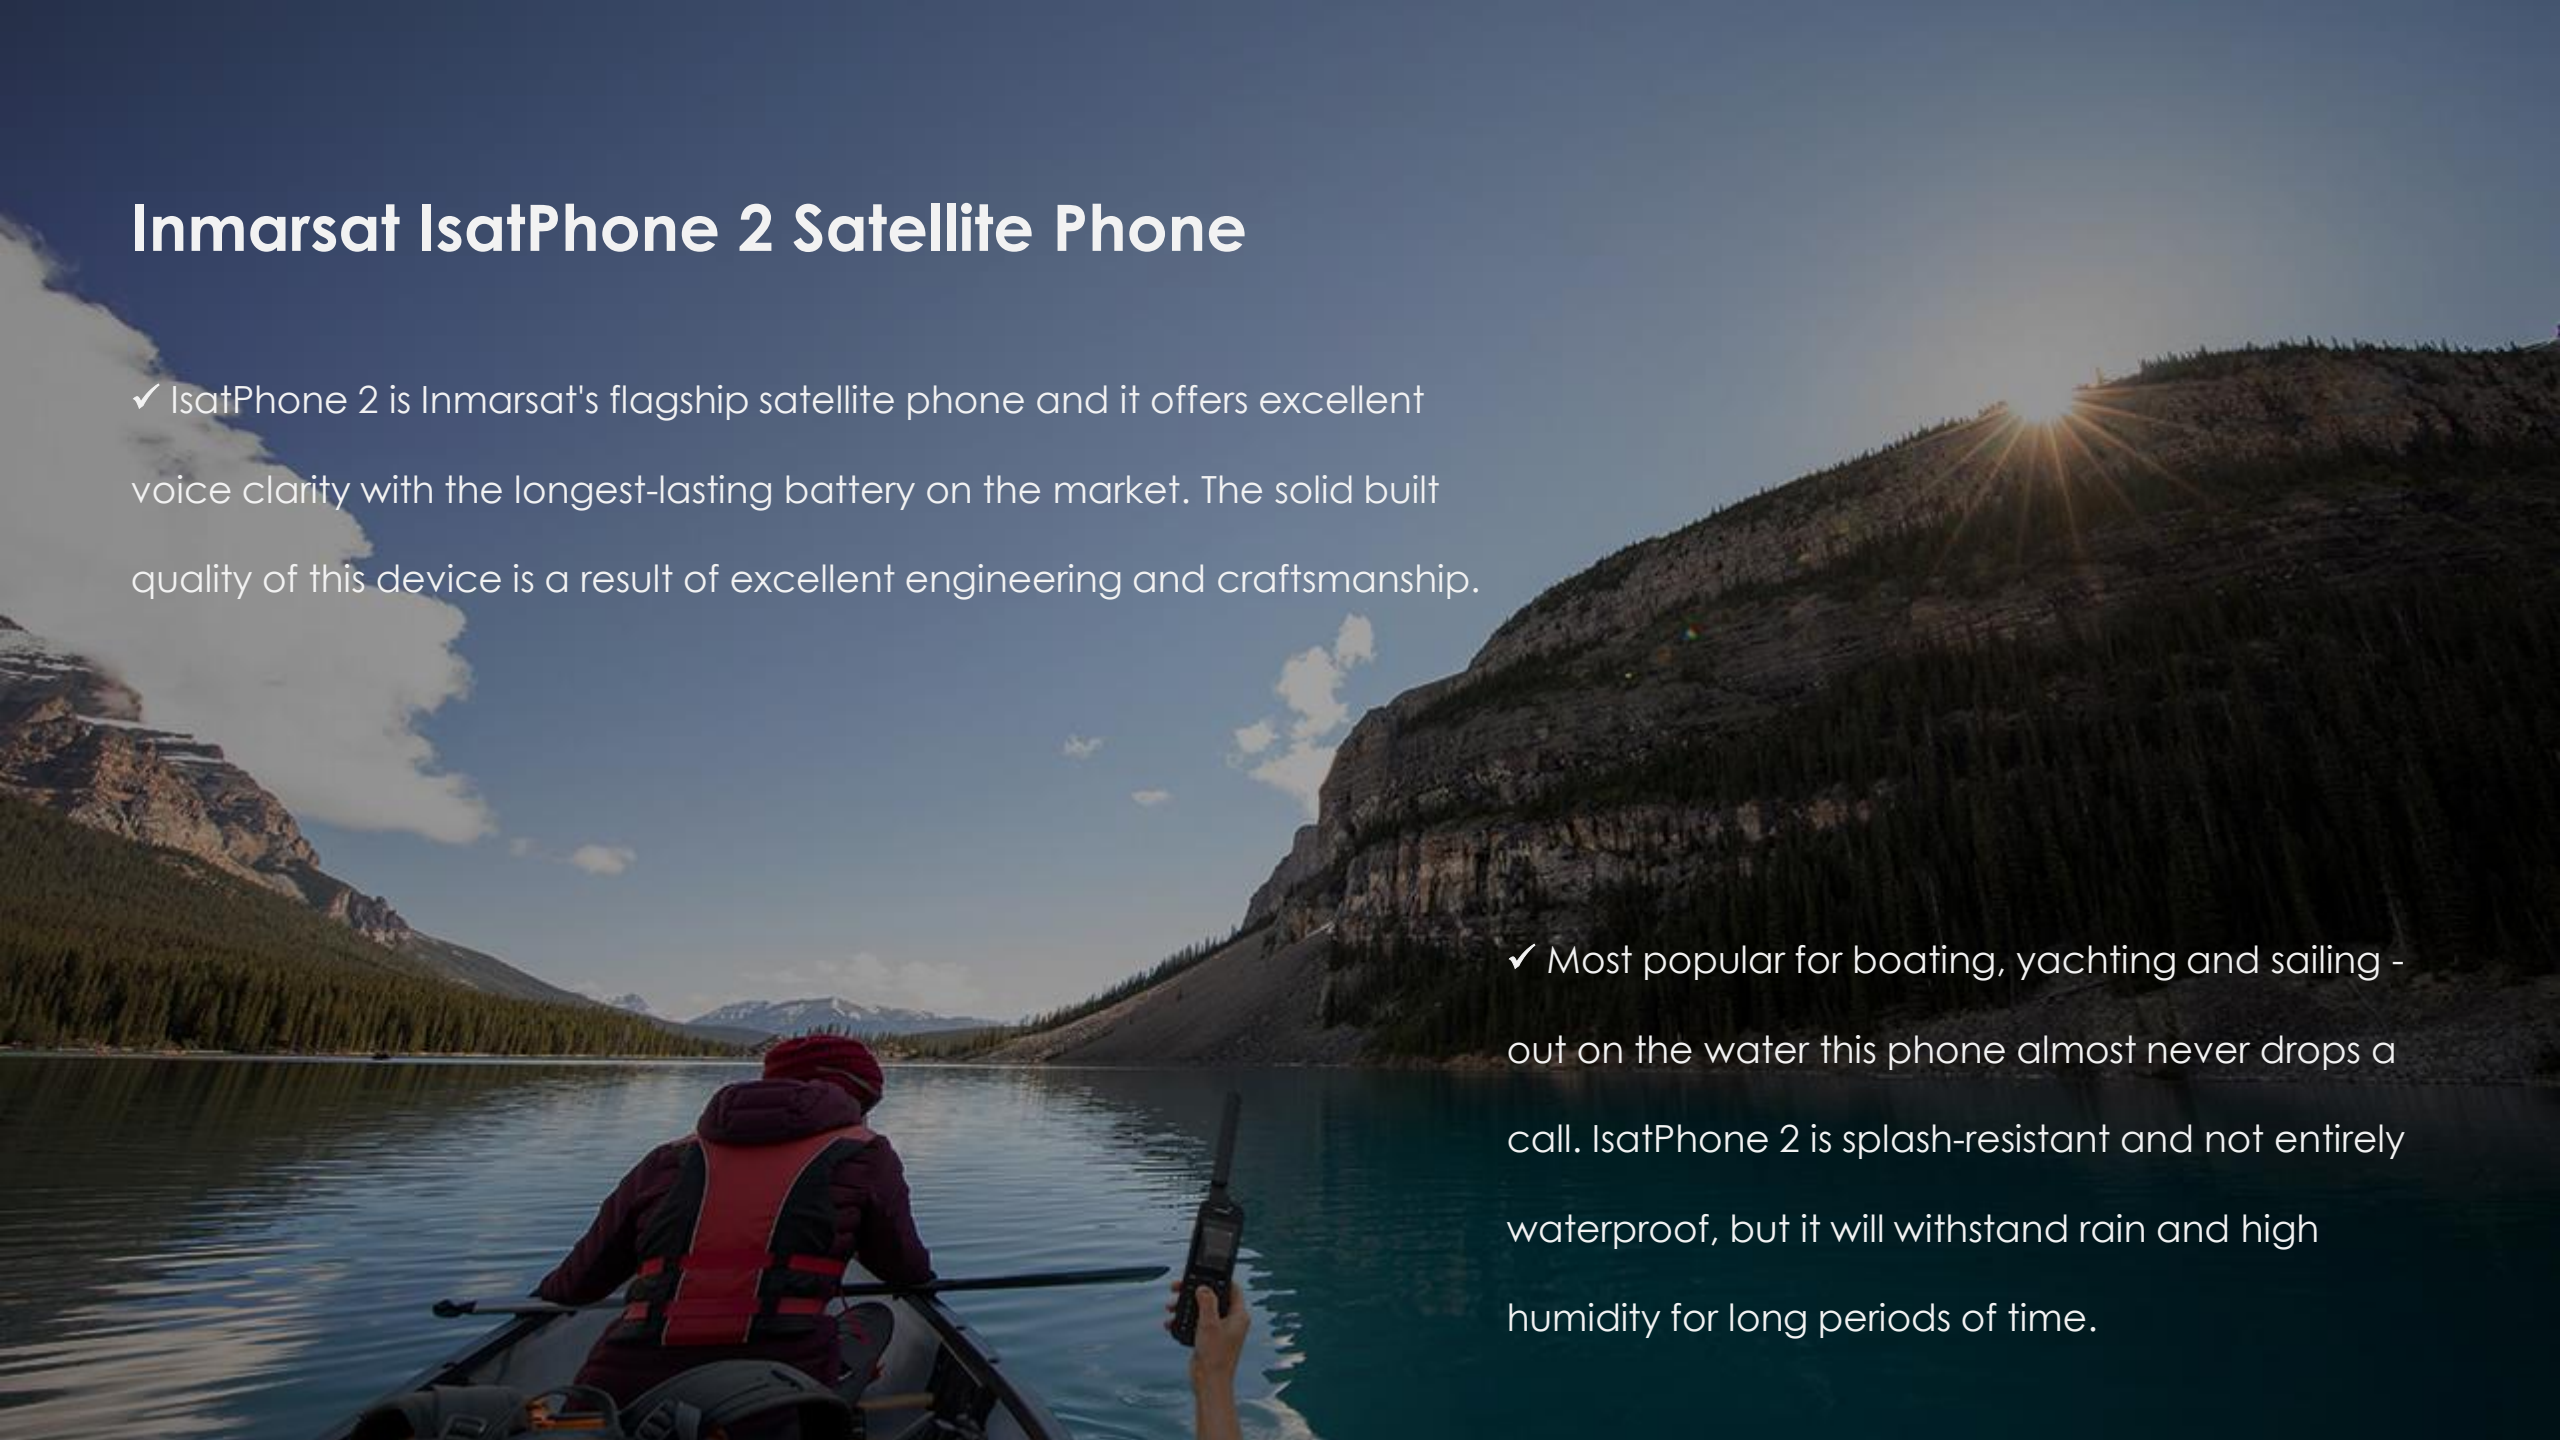

- ✓ Global Push To Talk (PTT) satellite radio for Iridium NEXT network.
- ✓ IP67 Waterproof, MIL-STD 810G
- ✓ Bluetooth PTT | GPS | 10.8 Ounces / 300 grams weight
- ✓ External Antenna compatible (SMA connector to any Iridium antenna)
- ✓ One-to-Many Communication (Up to 15 Groups)
- ✓ 1500 mW of Powerful Audio for Noisy Environments
- ✓ Long Battery Life: 24h Standby / 14.5 Hours Talk
- ✓ Interoperability 2 with IDAS™ and Analog Radios through the Optional ICOM VE-PG4, RoIP Gateway

Inmarsat IsatPhone 2 Satellite Phone

✓ IsatPhone 2 is Inmarsat's flagship satellite phone and it offers excellent voice clarity with the longest-lasting battery on the market. The solid built quality of this device is a result of excellent engineering and craftsmanship.

✓ Most popular for boating, yachting and sailing - out on the water this phone almost never drops a call. IsatPhone 2 is splash-resistant and not entirely waterproof, but it will withstand rain and high humidity for long periods of time.

ISATPHONE 2

BEST SATELLITE PHONE ON THE MARKET!

- ✓ FAST NETWORK REGISTRATION IN UNDER 45 SECONDS
- ✓ 8 HOURS OF TALK TIME AND UP TO 160 HOURS STANDBY
- ✓ EASY TO USE IN MULTIPLE LANGUAGES
- ✓ HIGH VOICE QUALITY
- ✓ DUST, SPLASH AND SHOCK RESISTANT (IP65, IK04)
- ✓ SOS

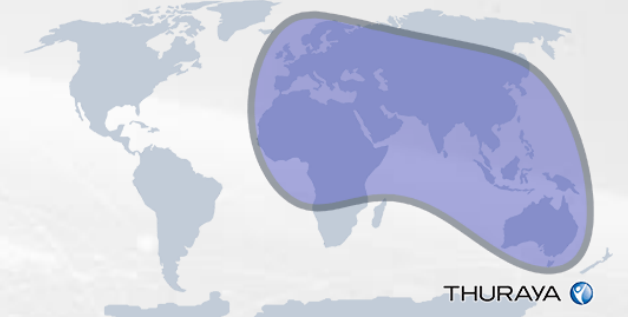

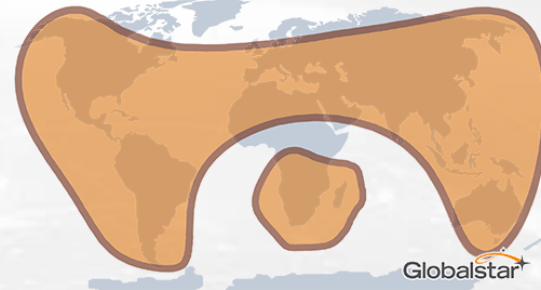

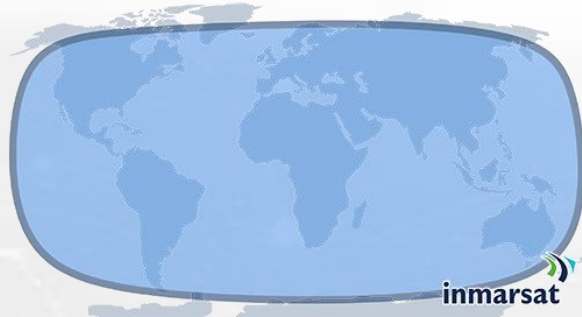

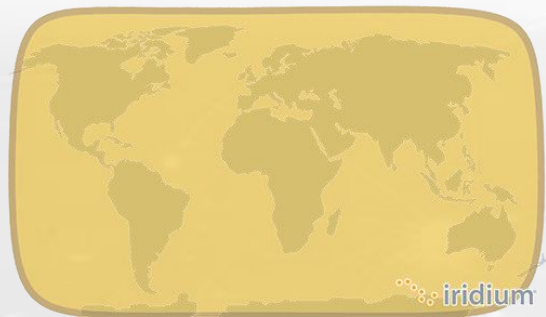

WHAT'S IN THE BOX

- ▶ Handset
- ▶ Battery
- ▶ Main charger — 4 Adaptors
- ▶ Car Charger — 10-30 volts
- ▶ Micro USB cable
- ▶ Wired hands-free headset
- ▶ Quick start guide (8 languages)
- ▶ Warranty
- ▶ Support USB memory drive
- ▶ Holster
- ▶ Lanyard strap

GLOBALSTAR GSP-1700

❓ Why do people need satellite phones?

Unlike traditional cell phones that rely on cell towers, satellite phones work anywhere on earth. Once you leave the city, satellite networks are the only networks offering reliable communication. For this reason, we have satellite phones that work anywhere, even in the most remote areas of the world. They offer reliable Voice, Text, GPS, and SOS and do an excellent job keeping you connected anywhere at sea, on expeditions, long hikes, remote job sites, mountains, deserts and even during a natural disaster.

❓ Should I rent or own a satellite phone?

If you need a satellite phone for more than 1 month of the year or multiple times a year it is recommended to buy a satellite phone instead. If you only need a satellite phone for one or two weeks at a time, renting one would be a better option.

❓ How fast can I get a satellite phone?

We can deliver a satellite phone to you as fast as the next day if major shipping companies offer that service to your area. In critical and emergency situations we can often deliver the device to you the same day via courier.

❓ What is Rollover minutes?

Rollover is an option to roll the unused minutes from this month to the next one and accumulate your unused airtime for later use. This option costs \$10 per month.

Iridium GO! - Satellite Hotspot

✓ Iridium GO is a small but powerful satellite communication device allowing multiple users to connect and use voice, text messaging, map and weather data as well as SOS and GPS navigation. Popular among sailors for it's Predict Wind integration and low cost service plans.

IRIDIUM GO

Iridium GO Satellite Hotspot

- Turn your smartphone into a satellite phone
- Send a quick GPS or check-in message
- Get GRIB files weather data
- Send emergency SOS
- Make voice calls
- Send email

- Iridium GO! status bar
- Iridium GO! battery life
- Configure settings
- Post updates to social media
- Set-up Wi-Fi data call
- Retrieve emails from external accounts
- View websites pages
- Access weather forecast
- Wide collection of Apps
- Compress and send photos

GSAT MICRO & NAL SHOUT NANO

Iridium GSat Micro Tracker

- Self-contained Iridium tracker
- SOS alerts
- Weather-resistant case
- USB Interface

Features

- 32-bit Cortex ARM processor with a fully user customizable LUA Scripting Language
- Bluetooth 4.0 (BLE)
- AES 256-bit Encryption
- SiRFstarIV GPS with an amazing -163dBm sensitivity
- Internal 2.5Ah Lithium Polymer battery & charger
- Battery Fuel Gauge
- Integrated high gain ceramic antenna dual tuned for Iridium and GPS
- Over the air configuration of the terminal
- SOS Button
- Accelerometer
- Magnetic Compass
- Weather Resistant Case
- Truly global coverage with the Iridium Satellite Network

Iridium NAL SHOUT Nano

- Handheld tracker
- Text messaging
- 2-way inbound and outbound status
- SOS alerts

Features

- Low-cost tracker and messaging device
- Programmed for either DoD or commercial Iridium gateway
- Ultra-low power consumption
- Automatic location reports (>1200 reports)
- Guarded 911 alert switch
- Waypoint soft key, Check-in soft key
- Free-text, canned messages or combined free-text and canned messages
- Data logging (waypoints and tracking reports)
- 256-bit AES encryption, USB interface
- Real-time, pole-to-pole coverage
- Weighs ~6.5 ounces, Volume of 4.0" x 2.2" x 0.8"
- Internal rechargeable battery using AC adapter, computer USB port or solar charger, Integrated motion sensor
- 50-channel GPS receiver with -160 dBm sensitivity

Internet of Things (IoT) Devices

Satellite Phone Store offers an extensive suite of M2M and IoT specific data terminals powered by the worlds most advanced satellite networks designed to allow you to monitor, control, and track assets even in the most rugged and remote areas of the world.

Global Coverage

- IoT Solution Provider
- One Device.
- One Network.
- One Contract.
- Global Connectivity.

Deployment Time

- Instant access to the satellites.
- No network development required.
- No need to source local carriers.
- Turn-key connectivity.

Reliability

- 99.9% network availability.
- Not reliant on ground infrastructure.
- No network congestion.
- Fully operational in disaster situations.

Security Systems

- Satellite IoT Devices are fully encrypted and can be used on the latest applications. Enhanced IoT security through sophisticated 256-bit AES encryption.
