

Head Offshore and Stay Connected with the TracPhone® V30

Whether you're heading out to the fishing grounds, island hopping with friends, or enjoying some rest and relaxation, the TracPhone V30 makes getting VSAT onboard easier and more affordable than ever!

The smallest, lightest, lowest-powered VSAT

The TracPhone V30's 37 cm, ultra-compact, DC-powered antenna¹ with integrated high-speed modem and single cable offers easy installation whether you want it on a flybridge or T-top. The innovative design delivers improved signal efficiency for superior performance, advanced precision tracking, and stabilization designed for every sea state.

¹ AC-to-DC power converter option available

Fast speeds, global connections & flexible plans

Want to stream HD content, chat via WhatsApp™ connect with the office, get weather information, browse the Internet, or just check emails? It's all possible, and more, with data speeds as fast as 6/2 Mbps (down/up) via the layered mini-VSAT Broadbandsm HTS network. And with a choice of no-commitment unlimited use or metered global airtime plans starting as low as \$99/month, you'll get the fastest data speeds at affordable rates with month-to-month service, flexible suspension policies, and no annual contract.

Compact, smart belowdecks unit – VSAT-Hub

The DC-powered VSAT-Hub is the streamlined all-in-one belowdecks unit that powers the TracPhone V30. 90% smaller by volume than 2U rack-mounted belowdeck units and offering much lower power consumption, it is ideal for center consoles. This commercial-grade system provides power to the antenna, and includes:

- A web-based, user-friendly interface
- Four Ethernet ports for LAN/VLAN support
- NMEA 0183 and 2000 inputs
- Built-in Wi-Fi, data routing, and firewall security
- VoIP adapter to support the phone line

TracPhone V30 Specifications

Antenna Diameter:	37 cm (14.5")
Weight:	10.6 kg (23.4 lbs)
Input Power:	10-30 VDC, 125W max
Antenna Type:	Ku-band
Coverage Area:	Worldwide

Easy network and data management in the palm of your hand

You'll enjoy access to all of your TracPhone V30 product information, support resources, and the powerful KVH Manager suite of tools via the secure myKVH Portal. KVH Manager's modern, mobile-optimized interface delivers valuable insight so you'll know exactly how your system is being used and avoid unexpected data consumption. Take advantage of features that offer:

- The ability to "Allow," "Restrict," or "Block" data usage in as many as 11 application category groups, such as Gaming, Real-time Entertainment, Web Browsing, and more
- Real-time usage monitoring and data consumption alerts
- Built-in data shaping

Whether you're on a laptop, a tablet, or a smartphone, you can make sure that your data is available for exactly what you want to use it for, wherever you cruise.

Stay safe with integrated cybersecurity

You'll also appreciate the added security of KVH's advanced multi-level cybersecurity that includes:

- A network-level firewall
- Secure boot
- Automated threat management
- Encrypted drives, and more

Confidence in your connectivity thanks to KVH's integrated IoT technology

Your TracPhone V30 reports daily on 150+ performance and health parameters to help KVH engineers and technical support experts optimize your system's performance for a premium connectivity experience.
